PROFESSIONAL SUMMARY

Achieved successful product development outcomes by leveraging academic insights and hands-on project experience in information technology. Produced high-quality, maintainable code through a dedication to continuous learning and problem-solving excellence.

SKILLS

- AI-Assisted MERN Stack Development
- Figma (UI/UX)
- React.js, Node.js, Express.js, MongoDB
- HTML, CSS, JavaScript

WORK HISTORY

MERN Stack Full Stack Web Developer Intern — May 2026 to July 2026

Yellow And Gray Studio Pvt Ltd, Chennai, Tamil Nadu

- Gained hands-on experience in **MERN Stack** (HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB).
- Developed **ASK Real Estate**, a full-stack property listing web application.
- Designed RESTful APIs with React, Node.js, Express.js, and MongoDB.
- Leveraged **AI tools (ChatGPT & Claude)** for development, debugging, and code optimization.
- Collaborated with the development team to implement and test new features.

EDUCATION

B.Tech, Information Technology — 2027 (Expected)

Agni College of Technology, Chennai, Tamil Nadu

CGPA: 8.53

Higher Secondary — March 2023

Zigma Matriculation Higher Secondary School, Chennai, Tamil Nadu

Secondary — March 2021

Zigma Matriculation Higher Secondary School, Chennai, Tamil Nadu

CERTIFICATIONS

- Java Basics
- Intro to MERN Stack
- Joy of Computing – Python (NPTEL)

PROJECTS

College Voting System – Face Recognition Mini Project

- Designed and implemented a secure college voting application that uses facial recognition to authenticate voters, eliminating proxy voting. Built a web-based interface integrated with a Python/OpenCV recognition engine.

Technologies: Python, OpenCV, Face Recognition, Web Interface

VR in Healthcare Mini Project

- Developed an interactive virtual-reality prototype for patient rehabilitation and medical-staff training. Researched VR integration with healthcare workflows and presented findings with a working demo.

Technologies: VR Technology, Healthcare UX, Prototyping
